

THE FIELD OF SPORTS MEDICINE

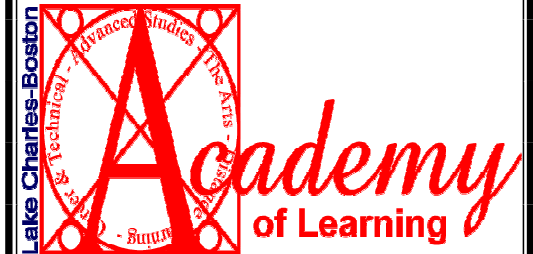

Athletic Trainers at work.

Sports medicine involves health care professionals, researchers and educators from a wide variety of disciplines. Its function is not only curative and rehabilitative, but especially preventive. The sports medicine "team" includes specialty physicians and surgeons, athletic trainers, physical therapists, coaches, and other personnel.

SPORTS MEDICINE CURRICULUM

Course Description Brochure

COURSE OFFERINGS

- Sports Medicine 1

This course is designed to provide an overview of the field of sports medicine as well as expose students to fundamental skills involved in a sports medicine health-care setting.

- Sports Medicine 2

This course, taught in the second semester, is designed to provide students with an overview of the pathology of sports injuries and the basic management skills.

Prerequisite: Sports Medicine 1.

- Sports Medicine 3

This course will provide an overview of common injuries and illnesses in sports and management strategies utilized by healthcare professionals. *Prerequisite: Sports Medicine 1 & 2*

- Allied Health Services 1

This course is designed to prepare the student with general entry-level skills and knowledge common to many allied healthcare areas. Clinical skills common to all health professions such as vital signs, height and weight, and ambulating of patients will be discussed. Additional instruction includes an overview of health professions, body mechanics, standard precautions, legal responsibilities, and medical terminology.

- Other Related courses: Introduction to Health Occupations, First Responder, EMT Basic, Pharmacy Tech, Biology 2.
